

I'd like to make it known that I am opposed to HR 4026 and it's corrolary petition to the FCC (no. 04-160), submitted by the National Association of Broadcasters. It's stance against technological advancement and violation of the principles of our free market economy make it an absurd argument. As an avid listener to broadcast radio and a satellite radio subscriber, I urge you to not encourage the NAB's efforts to stifle satellite radio.  
Thank you.
